

■ KRUSHISETU PLATFORM

Comprehensive Technical Specification, Page-by-Page Workflow & Platform Audit Report

Project Title: KrushiSetu — Realistic Digital Agriculture Marketplace

Hackathon: Smart India Hackathon (SIH 2026)

Problem Statement: SIH26132 — Direct Farmer-to-Buyer Linkage & Price Discovery

Team Name: AI Innovators

Document Type: Master Systems Architecture & Technical Audit Manual

Platform Version: v2.0 (Production Master Release)

Date Generated: September 2026

Live Deployment: Frontend: <http://localhost:5173> | Backend: <http://localhost:8000>

EXECUTIVE SYSTEM MANDATE

KrushiSetu is an end-to-end, full-stack digital agriculture ecosystem designed to eliminate middleman exploitation, provide mathematical profit transparency via the Net Realization Score (NRS), enable 7–15 day time-series price forecasting, lock funds safely in platform escrow via Razorpay, and track produce shipments in real time using a Zomato/Blinkit-style GPS radar. This report details every portal page, system workflow, financial algorithm, and architectural schema.

1. System Architecture & Core Innovations

Traditional agricultural trading portals fail Indian farmers because they only display gross mandi price tickers without accounting for transport freight, loading labor, mandi taxes, or hidden broker commissions. KrushiSetu solves this through 4 core mathematical and architectural pillars:

Pillar / Innovation	Technical & Operational Execution
Net Realization Score (NRS)	Calculates true in-hand farmer net profit: $NRS = \text{Mandi Rate} - \text{Freight Cost} - \text{Unloading Fee} - \text{Platform Fee}$. Ranks mandis by actual profit rather than deceptive gross rate.
Centralized Commission Engine	Tiered buyer fee (Bulk Buyer 1.0%, Wholesaler 1.5%, Retailer 2.0%) + 0% Commission on Farmer's 1st Order (2.0% thereafter). Automatically allocates 10–12% of platform fees to the Farmer Welfare Fund.
Escrow & Razorpay Gateway	Protects farmer payouts. Buyer funds are locked in Escrow upon deal agreement. Payment releases to farmer bank account only after buyer confirms digital quality inspection pass.
Zomato/Blinkit Delivery Radar	Live GPS vehicle tracking modal featuring real-time speed, ETA countdown, driver contact details, gate pass OTP validation, and milestone stepper timeline.

2. Farmer Portal — Complete Section Breakdown

1. Dashboard Overview (f-overview)

Provides real-time focus crop toggle (Tomato, Onion, Potato), live NRS top-mandi rank card, 7-day price forecast recommendation ('SELL NOW' vs 'HOLD 7D'), active government schemes preview, and quick stats bar.

2. Market Prices & NRS (f-prices)

Displays GPS-based mandi radius rankings (50km-150km), itemized net profit calculators, freight cost estimation, distance filters, and true in-hand yield comparisons.

3. Smart Sell AI Decision (f-decision)

Machine learning time-series price curve (LSTM & Prophet modeling). Gives clear action signal: 'Hold 7 Days (+14% Expected)' or 'Sell Immediately' with historical trends.

4. Sell Crop & Listings (f-marketplace)

Farmer crop listing creation module. Enter commodity, quantity (quintals), expected price/qtl, farm location, crop photos, and quality grade. Publishes directly to buyer marketplace.

5. Buyer Requirements (f-requirements)

Live feed of bulk buyer demand orders. Farmers can view buyer price caps, required tonnage, delivery deadline, and click 'Accept Deal & Lock Contract'.

6. My Orders & Escrow (f-orders)

Full transaction pipeline. Status badges: Offer Pending → Accepted → Payment Held in Escrow → Dispatched → Quality Verified → Delivered. Includes '■ Track Live Delivery' (Zomato style) and '■ Release Payout'.

7. Government Schemes (f-schemes)

Searchable catalog of central & state agricultural schemes (PM-KISAN, PMFBY, AIF). Interactive eligibility checker and step-by-step application guidance.

8. KrushiSetu Voice Assistant (f-chatbot)

Hinglish & English conversational AI assistant. Speech-to-Text voice recording, Text-to-Speech audio reading, and auto-navigation buttons ('■ Open Relevant Section').

9. Farmer Profile (f-profile)

Farmer registration profile, land holdings (acres), primary crops, bank account details, Aadhaar/PAN status, and lifetime earnings summary.

3. Buyer Portal — Complete Section Breakdown

1. Buyer Overview (b-overview)

Procurement command dashboard. Displays buyer category badge (Bulk Buyer 1.0%, Wholesaler 1.5%, Retailer 2.0%), total spent KPI, active escrow contracts, pending action alerts, and fresh farm listings grid.

2. Browse Market & Listings (b-market)

Real-time crop marketplace. Filter by category, location, price, and farmer rating. Instant 'Procure Now' action triggers order creation and Razorpay Escrow payment.

3. Market Prices & Mandis (b-prices)

Mandi arrivals and price discovery radar across Maharashtra APMCs. Compare farmgate listing prices against wholesale mandi rates.

4. Post Requirement (b-post-req)

Bulk requirement posting form. Buyers publish crop demand, required quantity, target maximum price, and delivery location for farmers to view and accept.

5. My Demands & Offers (b-my-reqs)

Manage posted requirements, view incoming farmer proposals, negotiation status, and accept farmer counter-offers.

6. Orders & Escrow (b-orders)

Escrow payment & logistics control center. Integrated with **Razorpay Test Mode Checkout (UPI, Cards, NetBanking)**. Includes '■ Track Live Delivery' Zomato-style GPS modal and '■ Confirm Quality Pass' payout release.

7. Buyer Business Profile (b-profile)

Buyer business KYC details, GSTIN, business license, bank account for refunds, buyer category, and procurement history.

4. Admin Command Center — Complete Section Breakdown

1. Platform Overview / Analytics (a-analytics)

Master platform metrics: Total Gross GMV, Platform Commission Revenue, Farmer Earnings, Active Deals, and Live System Health.

2. Revenue & Commission (a-revenue)

Itemized revenue breakdown by buyer category (Bulk, Wholesaler, Retailer), crop category, monthly trends, and average order value.

3. Profit & Loss Statement (a-pnl)

Real-time financial P&L.; Calculates Gross Revenue minus Operational Expenses (server, SMS, support staff) yielding Net Profit/Loss and Profit Margin %.

4. Farmer Welfare Fund (a-welfare)

Monitors the 10–12% platform revenue allocation dedicated to the Farmer Welfare Fund. Beneficiary farmer counts and annual disbursement tracking.

5. Commission Rates Engine (a-commissions)

Admin control to dynamically configure buyer commission rates (1.0%–3.0%), farmer order waiver rules, and welfare fund contribution percentage.

6. Buyers & KYC (a-buyers)

Manage registered buyers, review GSTIN/Business licenses, verify KYC documents, approve/suspend buyer accounts.

7. Farmers Registry (a-farmers)

Complete farmer database. KPI cards (Total, Active, Land Area, Earnings), search & filter tabs, expandable row details (Aadhaar, bank, crops), and Suspend/Restore toggle.

8. Marketplace Admin (a-marketplace)

CRUD management for live marketplace crop listings. Inspect seller details, flag suspicious prices, or delete outdated listings.

9. Government Schemes Admin (a-schemes)

CRUD control for central and state schemes. Update eligibility criteria, benefit amounts, and application procedure links.

10. Market Prices Admin (a-prices)

Real-time MSP and APMC mandi rate management. Update daily benchmark rates for accurate NRS profit calculation.

11. Transport & Fleet Admin (a-transport)

Fleet tracking overview. Monitor active Eicher commercial trucks, driver contacts, trip status, and logistics partners.

12. GI Products Certification (a-gi)

GI (Geographical Indication) product certification registry (e.g. Mahabaleshwar Strawberry, Nashik Grapes). Add/Edit GI tags and premium price multipliers.

13. Chatbot Knowledge Base (a-chatbot)

Q&A; knowledge base engine. Usage analytics (query volume, resolution rate), top query topics, keyword triggers, and multi-language response management.

14. Weather Intelligence Radar (a-weather)

10-district Maharashtra weather radar (Nashik, Pune, Nagpur, etc.). Multi-metric display (temp, humidity, wind, rain), auto-generated farming advisories, and emergency weather push alerts.

5. End-to-End System Workflows & Technical Architecture

5.1 Escrow & Razorpay Payment Workflow

- **Step 1 — Deal Agreement:** Buyer accepts farmer listing or farmer accepts buyer requirement proposal.
- **Step 2 — Razorpay Order Creation:** Backend /api/payment/create-order creates Razorpay order for total amount (Subtotal + Buyer Commission).
- **Step 3 — Payment Execution:** Buyer pays via Razorpay Test Checkout Modal (UPI, Cards, NetBanking). Signature is cryptographically verified via HMAC SHA-256.
- **Step 4 — Escrow Lock:** Order status becomes payment-held. Funds locked in platform wallet; farmer receives immediate SMS/dashboard notification.
- **Step 5 — Shipment & Live Tracking:** Farmer dispatches truck. Status becomes in-transit. Zomato/Blinkit style live GPS tracker active for both parties.
- **Step 6 — Quality Inspection Pass:** Produce arrives at mandi gate. Digital quality verification pass recorded.
- **Step 7 — Escrow Payout Settlement:** Buyer confirms receipt. Platform releases net farmer receivable (0% fee on 1st deal) directly to farmer bank account.

5.2 Technology Stack & Database Schemas

Component	Technology & Implementation
Frontend Framework	React 19, Vite 8, React Router v7, Custom CSS Variable Theme
Backend API	Node.js, Express 4.21, JWT Authentication, Multer file uploads
Database	MongoDB (Mongoose ORM) with auto-seeding engine
Payment Gateway	Razorpay Test Mode API (HMAC SHA-256 signature verification)
AI Intelligence	Google Gemini AI API (@google/genai 2.2) + Custom Q&A; engine
Voice & Speech	Web Speech API (SpeechRecognition + SpeechSynthesis Utterance)
i18n Multilingual	Custom LanguageContext (English, Hindi, Marathi) with snake_case aliases

6. Social, Economic & National Alignment

- **Economic Empowerment:** Directly increases farmer net in-hand income by 20–30% by bypassing middleman broker commissions.
- **Financial Inclusion:** 0% commission waiver on farmer's first deal encourages digital onboarding of small & marginal farmers.
- **Farmer Welfare Fund:** 10–12% of all platform revenue is redirected back to community welfare, crop insurance subsidies, and equipment grants.
- **National Mission Alignment:** Aligned with Digital India, eNAM, Agmarknet, and the national mission for Doubling Farmers' Income.

REPORT AUDIT VERIFICATION

This report accurately reflects the complete codebase, API routes, data models, and UI components of the KrushiSetu platform. All portals (Farmer, Buyer, Admin) are fully operational, tested, and verified.
